The nineteenth edition of the *Agricultural Outlook* provides projections to 2022 for the major agricultural commodities and biofuels, as well as for fish and seafood. Prepared jointly with the Food and Agriculture Organization of the United Nations, the *Agricultural Outlook* discusses in detail recent market trends and likely future developments.

This report foresees continuing high commodity prices and concerns over food price inflation. It includes a special chapter on China and new coverage of the cotton industry. Projections and past trends are presented in a statistical annex.
