**Advanced Technologies in Modern Robotic Applications** Chenguang Yang, Hongbin Ma, Mengyin Fu

This book presents in a systematic manner the advanced technologies used for various modern robot applications. By bringing fresh ideas, new concepts, novel methods and tools into robot control, robot vision, human robot interaction, teleoperation of robot and multiple robots system, we are to provide a state-of-the-art and comprehensive treatment of the advanced technologies for a wide range of robotic applications. Particularly, we focus on the topics of advanced control and obstacle avoidance techniques for robot to deal with unknown perturbations, of visual servoing techniques which enable robot to autonomously operate in a dynamic environment, and of advanced techniques involved in human robot interaction. The book is primarily intended for researchers and engineers in the robotic and control community. It can also serve as complementary reading for robotics at the both graduate and undergraduate levels.

### **From reader reviews:**

#### **Warren Matt:**

Here thing why this Advanced Technologies in Modern Robotic Applications are different and dependable to be yours. First of all studying a book is good but it really depends in the content from it which is the content is as tasty as food or not. Advanced Technologies in Modern Robotic Applications giving you information deeper as different ways, you can find any guide out there but there is no e-book that similar with Advanced Technologies in Modern Robotic Applications. It gives you thrill reading through journey, its open up your current eyes about the thing that happened in the world which is probably can be happened around you. You can easily bring everywhere like in park, café, or even in your method home by train. If you are having difficulties in bringing the published book maybe the form of Advanced Technologies in Modern Robotic Applications in e-book can be your substitute.

#### **Mindy Martinez:**

Now a day individuals who Living in the era wherever everything reachable by connect with the internet and the resources within it can be true or not need people to be aware of each details they get. How a lot more to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Studying a book can help individuals out of this uncertainty Information specially this Advanced Technologies in Modern Robotic Applications book as this book offers you rich facts and knowledge. Of course the details in this book hundred per cent guarantees there is no doubt in it as you know.

#### **Gerald Patton:**

The particular book Advanced Technologies in Modern Robotic Applications has a lot details on it. So when you read this book you can get a lot of benefit. The book was published by the very famous author. This articles author makes some research ahead of write this book. This kind of book very easy to read you may get the point easily after reading this article book.

#### **Mac Cutter:**

Is it a person who having spare time in that case spend it whole day by simply watching television programs or just laying on the bed? Do you need something totally new? This Advanced Technologies in Modern Robotic Applications can be the response, oh how comes? A fresh book you know. You are and so out of date, spending your time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?
