Environmental Effects of Offshore Oil Production: The Buccaneer Gas and Oil Field Study (Marine Science)

Environmental Effects of Offshore Oil Production: The Buccaneer Gas and Oil Field Study (Marine Science)

The Buccaneer Gas and Oil Field Study has been the most comprehensive research project to date concerned with assessing the ecological effects of offshore production activities. It took nearly five years to complete and involved almost 30 individual research groups. All of the raw data have been archived with NOAA's Environmental Data and Information Services, and detailed technical reports have been deposited with the National Technical Information Service so the interested investigator should be able to gain access to them. However, we felt that it would be desirable to present a distillation of our more significant findings in a form that was more readily available to the scientific and lay community. Thus, we conducted a symposium on the study during EXPOCHEM '80 at the Astrohall, Houston, Texas during October, 1980. This volume comprises the proceedings of that symposium. All but two of the papers presented are included in this book. Manuscripts were not received from Dr. D. A. Wiesenburg (Texas A&M University: Volatile Hydrocarbons) or Dr. J. Tillery (Southwest Research Institute: Trace Metals), but these topics are adequately covered by other authors. An introductory chapter was added to place the study in its proper perspective and to provide some background material on the Buccaneer Field, a brief chapter on biocides was inserted since this topic generated much discussion at the symposium, and a bibliography is provided to direct the interested reader to sources of additional information on the Study.

From reader reviews:

Betty Lavery:

Typically the book Environmental Effects of Offshore Oil Production: The Buccaneer Gas and Oil Field Study (Marine Science) will bring that you the new experience of reading any book. The author style to describe the idea is very unique. In case you try to find new book to read, this book very suitable to you. The book Environmental Effects of Offshore Oil Production: The Buccaneer Gas and Oil Field Study (Marine Science) is much recommended to you to read. You can also get the e-book from official web site, so you can quickly to read the book.

Ruth Haakenson:

Spent a free time for you to be fun activity to do! A lot of people spent their free time with their family, or all their friends. Usually they carrying out activity like watching television, about to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your free time/ holiday? Could possibly be reading a book could be option to fill your no cost time/ holiday. The first thing that you ask may be what kinds of e-book that you should read. If you want to try out look for book, may be the reserve untitled Environmental Effects of Offshore Oil Production: The Buccaneer Gas and Oil Field Study (Marine Science) can be very good book to read. May be it is usually best activity to you.

Richard Davy:

Your reading sixth sense will not betray you actually, why because this Environmental Effects of Offshore Oil Production: The Buccaneer Gas and Oil Field Study (Marine Science) reserve written by well-known writer whose to say well how to make book that can be understand by anyone who read the book. Written with good manner for you, still dripping wet every ideas and writing skill only for eliminate your personal hunger then you still hesitation Environmental Effects of Offshore Oil Production: The Buccaneer Gas and Oil Field Study (Marine Science) as good book not simply by the cover but also from the content. This is one e-book that can break don't ascertain book by its protect, so do you still needing another sixth sense to pick this!?! Oh come on your reading sixth sense already told you so why you have to listening to an additional sixth sense.

Gail Boutwell:

Reading a book to be new life style in this yr; every people loves to go through a book. When you examine a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what forms of book that you have read. In order to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, as well as soon. The Environmental Effects of Offshore Oil Production: The Buccaneer Gas and Oil Field Study (Marine Science) will give you a new experience in studying a book.
