Advanced Information Systems Engineering

Advanced Information Systems Engineering
TheexplosivegrowthoftheInternetandtheWebhavecreatedanever-growing demand for information systems, and ever-growing challenges for Information Systems Engineering. The series of Conferences on Advanced Information S- tems Engineering (CAiSE) was launched in Scandinavia by Janis Bubenko and Arne Solvberg in 1989, became an important European conference, and was held annually in major European sites throughout the 1990s. Now, in its 14th year,CAiSEwasheldforthe?rsttimeoutsideEurope,showcasinginternational researchon information systems and their engineering. Not surprisingly, this year the conference enjoyed unprecedented attention. In total, the conference received 173 paper submissions, the highest number ever for a CAiSE conference. Of those, 42 were accepted as regular papers and 26 as short (poster) papers. In addition, the conference received 12 proposals for workshops of which 8 were approved, while 4 tutorials were selected from 15 submissions. The technical program was put together by an international committee of 81 experts. In total, 505 reviews were submitted, with every member of the committeecontributing.Decisionsonallsubmissionswerereachedataprogram committee meeting in Toronto on January 26-27,2002. Workshop and tutorial proposals were handled separately by committees chaired by Patrick Martin (workshops), and Jarek Gryz and Richard Paige (tutorials). We wish to extend a great "THANK YOU!" to all members of the program and organizing committees for their volunteer contributions of time and exp- tise. The fact that so many busy (and famous!) people took the trouble to help uswiththeorganizationofthisconferenceandtheformationofitstechnicalp- gram speaks well for the future of CAiSE and the ?eld of Information Systems Engineering.

From reader reviews:

Maureen Harris:

The book Advanced Information Systems Engineering make you feel enjoy for your spare time. You can utilize to make your capable much more increase. Book can for being your best friend when you getting strain or having big problem along with your subject. If you can make reading a book Advanced Information Systems Engineering to become your habit, you can get considerably more advantages, like add your own capable, increase your knowledge about many or all subjects. You are able to know everything if you like start and read a book Advanced Information Systems Engineering. Kinds of book are a lot of. It means that, science reserve or encyclopedia or others. So , how do you think about this book?

Robert Lindsey:

The particular book Advanced Information Systems Engineering has a lot associated with on it. So when you read this book you can get a lot of gain. The book was authored by the very famous author. Mcdougal makes some research previous to write this book. This book very easy to read you can find the point easily after reading this book.

Mary Brunner:

As a pupil exactly feel bored to reading. If their teacher requested them to go to the library as well as to make summary for some publication, they are complained. Just small students that has reading's heart or real their interest. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that examining is not important, boring and also can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Advanced Information Systems Engineering can make you truly feel more interested to read.

Norma Ochoa:

A lot of people said that they feel weary when they reading a book. They are directly felt it when they get a half regions of the book. You can choose the book Advanced Information Systems Engineering to make your own reading is interesting. Your skill of reading proficiency is developing when you similar to reading. Try to choose straightforward book to make you enjoy you just read it and mingle the impression about book and studying especially. It is to be very first opinion for you to like to wide open a book and examine it. Beside that the book Advanced Information Systems Engineering can to be your brand-new friend when you're sense alone and confuse with the information must you're doing of this time.
