The Ultimate Guide to Learn Java Programming Fast (Java for Beginners, Java for dummies, how to program, java apps, java programming)

Java is parallel to the C# programming language. However, Java can be considered as an object-oriented language and it also features enormous learning curves and potentials for beginners. The aim of this book is to help complete beginners in getting comfortable with the Java programming language. The Complete Guide on Java – 2015 Edition will discuss the vital topics of the Java language. These topics will serve as the stepping stone of any beginners which will pave their way into the wide realm of Java. As per the statement of the company behind the programming language, there are more than nine million Java developers around the globe as of the writing of this book.

This book will cover the following topics:

- Programming Structure of the Java Language
- Introduction to Object-Oriented Programming
- Key Concepts of Object-Oriented Programming
- Declaration and Management of Variables
- Data Types
- Integrating Other Classes

- Access Modifiers
- Closer Look on Objects and Classes

C++

The Ultimate Guide to Learn C Programming (c plus plus, C++ for beginners, programming computer, how to program)

The evolution that we have seen in technology in the last 10 years, has seen nearly everything that we interact with on a daily basis be controlled by a computer. As we know, all computers operate using a programming language most commonly referred to as C++. To many, C++ looks like a type of language that they will never be able to understand. However, learning C++ is much easier than you would think. Every process, large or small, are a series of smaller steps which achieve the end result. When you break down the computer programming language into smaller steps, you will quickly be able to come to terms with what everything means in no time at all. Through this book, you will learn the basics that every beginner wanting to learn about C++ should know.

Here is a preview of what you'll learn:

- How to make our very first C++ program in less than 10 minutes.
- What software can we use to write C++ code.
- How to expand our program using variables.
- Different types of operators.
- How to make programs that loop.
- Solving simple problems using conditions and pointers.
