Lab Dynamics: Management Skills for Scientists Carl Cohen, Suzanne Cohen

Scientists are trained in scholarship and technical skills but not, typically, in how to deal with their peers, supervisors, or staff who report to them. Yet even a first-rate research project can fail or flounder if the people concerned can't get along. *Lab Dynamics* is a book about the challenges of doing science and dealing with the individuals involved, including oneself. The authors, a scientist and a psychotherapist, draw on principles of group and behavioral psychology but speak to scientists in their own language. They offer in-depth, practical advice, real-life examples, and exercises tailored to scientific and technical workplaces on topics as diverse as conflict resolution, negotiation, dealing with supervision, working with competing peers, and making transitions between academia and industry. This book addresses a subject of direct importance to lab heads, postdocs, students, and managers concerned about improving the effectiveness of academic and industrial research. Related Titles from the Publisher *Live Cell Imaging: A Laboratory Manual* *Cells: A Laboratory Manual* *Molecular Cloning: A Laboratory Manual* *Imaging in Neuroscience and Development: A Laboratory Manual* *Lab Math Lab Ref, Volume 2: A Handbook of Recipes, Reagents, and Other Reference Tools for Use at the Bench* *At the Bench* *At the Helm* *Using Antibodies: A Laboratory Manual*
