A greatly expanded, updated, and detailed description of objectivist and interpretivist research in music therapy, guided by the recommendations of a diverse group of experienced music therapists. The book begins with an introduction to the nature of music therapy research and its relation to theory and practice. Steps in doing research are then detailed, and the foundations and principles of objectivist and interpretivist paradigms are outlined. After methodological issues inherent in each paradigm are examined, individual chapters are provided for every type, method, and design of research that has been used in music therapy, all using the same outline.
