Multidimensional Nonlinear Descriptive Analysis Shizuhiko Nishisato
Quantification of categorical, or non-numerical, data is a problem that scientists face across a wide range of disciplines. Exploring data analysis in various areas of research, such as the social sciences and biology, **Multidimensional Nonlinear Descriptive Analysis** presents methods for analyzing categorical data that are not necessarily sampled randomly from a normal population and often involve nonlinear relations.

This reference not only provides an overview of multidimensional nonlinear descriptive analysis (MUNDA) of discrete data, it also offers new results in a variety of fields. The first part of the book covers conceptual and technical preliminaries needed to understand the data analysis in subsequent chapters. The next two parts contain applications of MUNDA to diverse data types, with each chapter devoted to one type of categorical data, a brief historical comment, and basic skills peculiar to the data types. The final part examines several problems and then concludes with suggestions for future progress.

Covering both the early and later years of MUNDA research in the social sciences, psychology, ecology, biology, and statistics, this book provides a framework for potential developments in even more areas of study.

From reader reviews:

James Senters:

The ability that you get from Multidimensional Nonlinear Descriptive Analysis is a more deep you digging the information that hide inside words the more you get thinking about reading it. It doesn't mean that this book is hard to know but Multidimensional Nonlinear Descriptive Analysis giving you excitement feeling of reading. The author conveys their point in specific way that can be understood by simply anyone who read the idea because the author of this e-book is well-known enough. This book also makes your personal vocabulary increase well. Making it easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having this kind of Multidimensional Nonlinear Descriptive Analysis instantly.

Michael Pabon:

People live in this new time of lifestyle always attempt to and must have the extra time or they will get lot of stress from both everyday life and work. So , whenever we ask do people have free time, we will say absolutely indeed. People is human not just a robot. Then we consult again, what kind of activity are there when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading books. It can be your alternative within spending your spare time, typically the book you have read is Multidimensional Nonlinear Descriptive Analysis.

Donald Labelle:

In this age globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of references to get information example: internet, newspaper, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. The book that recommended to you is Multidimensional Nonlinear Descriptive Analysis this e-book consist a lot of the information of the condition of this world now. This kind of book was represented how does the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. The writer made some research when he makes this book. Honestly, that is why this book suitable all of you.

Orville Hightower:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you can have it in e-book technique, more simple and reachable. That Multidimensional Nonlinear Descriptive Analysis can give you a lot of friends because by you considering this one book you have factor that they don't and make anyone more like an interesting person. This kind of book can be one of one step for you to get success. This book offer you information that maybe your friend doesn't realize, by knowing more than other make you to be great persons. So , why hesitate? We need to have Multidimensional Nonlinear Descriptive Analysis.
