Daring is a very special duck, a duck on a mission to experience all that life will afford him. But it's life's unexpected miracles that truly lead the way for his enlightened discoveries. The Duck That Wanted To Be is an inspiring story that will entertain as well as challenge, for it has a message to accompany the edifying vocabulary, a validation of the wondrousness found as one travels along the road of life. There are over 1700 key vocabulary words contained in this story, but there is one extra special bonus: a story guaranteed to make you smile. This enchanting story of innocence and discovery will turn any teenager into an avid reader, even those who are weak in verbal skills. Tested in Hawaii high school lower-level reading classes, results showed: • increased vocabulary • increased student concentration • increased student confidence Reading requires two basic ingredients: concentration and reading skills. Concentration can be developed by reading interesting stories; reading skills (specifically, trained eye-movement) can be improved upon only when concentration is developed. Therefore, the best way to build reading skills is to read interesting, yet full-length stories. This reading primer trilogy is the perfect companion, especially for students not proficient in reading. Each story in the SAT/ACT Vocabulary-Building Novel Series is fast-paced (maximizing eye-movement, a critical skill for faster, more efficient reading) and yet evocative (laced with college-critical vocabulary and complex psychological undertones). Students who like to read soon become good readers. This book is an excellent first step toward reading-mastery. Suggestions for Maximum Improvement: • Read uninterrupted for enhanced concentration development. • Highlight unfamiliar words to review either during the reading or afterwards, as an independent vocabulary-building exercise. Whether for fun or serious reading skill-building, this story will provide hours of pleasurable and productive verbal reinforcement, essential to best prepare for new worlds of opportunity as only a lifetime of reading can offer.
