Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics)

Enormous advances in information technology have permeated essentially all facets of life in the past two decades. Formidable challenges remain in fostering tools that enhance productivity but are sensitive to work practices. Cognitive Informatics (CI) is the multidisciplinary study of cognition, information and computational sciences that investigates all facets of human computing including design and computer-mediated intelligent action, thus is strongly grounded in methods and theories from cognitive science. As an applied discipline, it has a close affiliation with human factors and human-computer interaction, and provides a framework for the analysis and modeling of complex human performance in technology-mediated settings and contributes to the design and development of better information systems. In recent years, CI has emerged as a distinct area with special relevance to biomedicine and health care. In addition, it has become a foundation for education and training of health informaticians, the Office of the National Coordinator for Health Information Technology initiating a program including CI as one of its critical elements to support health IT curriculum development. This book represents a first textbook on cognitive informatics and will focus on key examples drawn from the application of methods and theories from CI to challenges pertaining to the practice of critical-care medicine (CCM). Technology is transforming critical care workflows and re-organizing patient care management processes. CCM has proven to be a fertile test bed for theories and methods of cognitive informatics. CI, in turn, has contributed much to our understanding of the factors that result in complexity and patient errors. The topic is strongly interdisciplinary and will be important for individuals from a range of academic and professional backgrounds, including critical care specialists, psychologists, computer scientists, medical informaticians, and anthropologists.??

From reader reviews:

Mary Clark:

Book is written, printed, or created for everything. You can realize everything you want by a book. Book has a different type. As you may know that book is important point to bring us around the world. Alongside that you can your reading skill was fluently. A reserve Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) will make you to be smarter. You can feel much more confidence if you can know about everything. But some of you think in which open or reading some sort of book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you in search of best book or appropriate book with you?

Nathaniel Mathis:

This Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) book is not really ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is information inside this publication incredible fresh, you will get data which is getting deeper an individual read a lot of information you will get. That Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) without we realize teach the one who examining it become critical in thinking and analyzing. Don't end up being worry Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) can bring if you are and not make your handbag space or bookshelves' become full because you can have it inside your lovely laptop even mobile phone. This Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) having good arrangement in word along with layout, so you will not experience uninterested in reading.

Luis Poole:

Beside this Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) in your phone, it could give you a way to get closer to the new knowledge or info. The information and the knowledge you can got here is fresh in the oven so don't possibly be worry if you feel like an old people live in narrow small town. It is good thing to have Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) because this book offers to your account readable information. Do you occasionally have book but you do not get what it's exactly about. Oh come on, that won't happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, such as treasuring beautiful island. So do you still want to miss it? Find this book in addition to read it from at this point!

Cynthia Cisneros:

Don't be worry when you are afraid that this book will certainly filled the space in your house, you will get it in e-book approach, more simple and reachable. This Cognitive Informatics in Health and Biomedicine: Case

Studies on Critical Care, Complexity and Errors (Health Informatics) can give you a lot of friends because by you taking a look at this one book you have issue that they don't and make you actually more like an interesting person. This kind of book can be one of a step for you to get success. This e-book offer you information that might be your friend doesn't learn, by knowing more than different make you to be great men and women. So , why hesitate? We should have Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics).
