**Scaly Spotted Feathered Frilled: How do we know what dinosaurs really looked like?** Catherine Thimmesh

No human being has ever seen a triceratops or velociraptor or even the mighty *Tyrannosaurus rex*. They left behind only their impressive bones. So how can scientists know what color dinosaurs were? Or if their flesh was scaly or feathered? Could that fierce *T.rex* have been born with spots?

In a first for young readers, the Sibert medalist Catherine Thimmesh introduces the incredible talents of the paleoartist, whose work reanimates gone-but-never-forgotten dinosaurs in giant full-color paintings that are as strikingly beautiful as they aim to be scientifically accurate, down to the smallest detail. Follow a paleoartist through the scientific process of ascertaining the appearance of various dinosaurs from millions of years ago to learn how science, art, and imagination combine to bring us face-to-face with the past.
