Securing Citrix XenApp Server in the Enterprise Tariq Azad

Citrix Presentation Server allows remote users to work off a network server as if they weren't remote. That means: Incredibly fast access to data and applications for users, no third party VPN connection, and no latency issues. All of these features make Citrix Presentation Server a great tool for increasing access and productivity for remote users. Unfortunately, these same features make Citrix just as dangerous to the network it's running on. By definition, Citrix is granting remote users direct access to corporate servers?..achieving this type of access is also the holy grail for malicious hackers. To compromise a server running Citrix Presentation Server, a hacker need not penetrate a heavily defended corporate or government server. They can simply compromise the far more vulnerable laptop, remote office, or home office of any computer connected to that server by Citrix Presentation Server.

All of this makes Citrix Presentation Server a high-value target for malicious hackers. And although it is a high-value target, Citrix Presentation Servers and remote workstations are often relatively easily hacked, because they are often times deployed by overworked system administrators who haven't even configured the most basic security features offered by Citrix. "The problem, in other words, isn't a lack of options for securing Citrix instances; the problem is that administrators aren't using them." (eWeek, October 2007). In support of this assertion Security researcher Petko D. Petkov, aka "pdp", said in an Oct. 4 posting that his recent testing of Citrix gateways led him to "tons" of "wide-open" Citrix instances, including 10 on government domains and four on military domains.

* The most comprehensive book published for system administrators providing step-by-step instructions for a secure Citrix Presentation Server.

* Special chapter by Security researcher Petko D. Petkov'aka "pdp" detailing tactics used by malicious hackers to compromise Citrix Presentation Servers.

* Companion Web site contains custom Citrix scripts for administrators to install, configure, and troubleshoot Citrix Presentation Server.

From reader reviews:

Katie Martinez:

Nowadays reading books be a little more than want or need but also get a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book this improve your knowledge and information. The info you get based on what kind of reserve you read, if you want have more knowledge just go with training books but if you want experience happy read one with theme for entertaining like comic or novel. The Securing Citrix XenApp Server in the Enterprise is kind of publication which is giving the reader erratic experience.

Davis Miller:

The book Securing Citrix XenApp Server in the Enterprise will bring someone to the new experience of reading a book. The author style to explain the idea is very unique. When you try to find new book to read, this book very suitable to you. The book Securing Citrix XenApp Server in the Enterprise is much recommended to you to learn. You can also get the e-book through the official web site, so you can easier to read the book.

Eden Davis:

You can spend your free time to learn this book this book. This Securing Citrix XenApp Server in the Enterprise is simple to create you can read it in the recreation area, in the beach, train and soon. If you did not have got much space to bring typically the printed book, you can buy the e-book. It is make you simpler to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Angela Thomas:

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library in order to make summary for some e-book, they are complained. Just tiny students that has reading's soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that looking at is not important, boring along with can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Securing Citrix XenApp Server in the Enterprise can make you sense more interested to read.
