Enzymology LabFax

Enzymology LabFax

LABFAX volumes are purpose-designed data reference books for practicing scientists. Each book presents key information for a major subject in one place and so saves hours of searching. The authors and editors of each LABFAX volume have searched the original literature for the accurate data which they know the specialist needs.

Enzymology Labfax is a comprehensive compendium of data on enzyme kinetics, measurement of enzyme activity, physical factors which affect activity and patterns of enzyme inhibition. Information is also provided on, for example, coenzymes and analogs, and the analysis of ligand binding and metalloenzyme reactivity, as well as important information on buffers, chelating agents and detergents required on a daily basis.

The contents of **Enzymology Labfax** have been carefully chosen to complement the data presented in **Proteins Labfax**, which is therefore the companion volume to this text.

*

- * Serves as a companion volume to Proteins Labfax
- * Comprehensive coverage of enzyme activity and reactions
- * Extensive information presented on factors affecting enzymology
- * A complete one stop source for enzymologists and researchers in the field
