Security Threat Mitigation and Response: Understanding Cisco Security MARS Dale Tesch, Greg Abelar

Identify, manage, and counter security threats with the Cisco Security Monitoring, Analysis, and Response System

Dale Tesch

Greg Abelar

While it is commonly understood that deploying network security devices is critical to the well-being of an organization's systems and data, all too often companies assume that simply having these devices is enough to maintain the integrity of network resources. To really provide effective protection for their networks, organizations need to take the next step by closely examining network infrastructure, host, application, and security events to determine if an attack has exploited devices on their networks.

Cisco® Security Monitoring, Analysis, and Response System (Cisco Security MARS) complements network and security infrastructure investment by delivering a security command and control solution that is easy to deploy, easy to use, and cost-effective. Cisco Security MARS fortifies deployed network devices and security countermeasures, empowering you to readily identify, manage, and eliminate network attacks and maintain compliance.

Security Threat Mitigation and Response helps you understand this powerful new security paradigm that reduces your security risks and helps you comply with new data privacy standards. This book clearly presents the advantages of moving from a security reporting system to an all-inclusive security and network threat recognition and mitigation system. You will learn how Cisco Security MARS works, what the potential return on investment is for deploying Cisco Security MARS, and how to set up and configure Cisco Security MARS in your network.

“Dealing with gigantic amounts of disparate data is the next big challenge in computer security; if you're a Cisco Security MARS user, this book is what you've been looking for.”

–Marcus J. Ranum, Chief of Security, Tenable Security, Inc.

Dale Tesch is a product sales specialist for the Cisco Security MARS product line for the Cisco Systems® United States AT Security team. Dale came to Cisco Systems through the acquisition of Protego Networks in February 2005. Since then, he has had the primary responsibilities of training the Cisco sales and engineering team on SIM systems and Cisco Security MARS and for providing advanced sales support to Cisco customers.

Greg Abelar has been an employee of Cisco Systems since December 1996. He was an original member of the Cisco Technical Assistance Security team, helping to hire and train many of the team's engineers. He has held various positions in both the Security Architecture and Security Technical Marketing Engineering teams at Cisco.

- Understand how to protect your network with a defense-in-depth strategy
- Examine real-world examples of cost savings realized by Cisco Security MARS deployments
- Evaluate the technology that underpins the Cisco Security MARS appliance
- Set up and configure Cisco Security MARS devices and customize them for your environment
- Configure Cisco Security MARS to communicate with your existing hosts, servers, network devices, security appliances, and other devices in your network
- Investigate reported threats and use predefined reports and queries to get additional information about events and devices in your network
- Use custom reports and custom queries to generate device and event information about your network and security events
- Learn firsthand from real-world customer stories how Cisco Security MARS has thwarted network attacks

This security book is part of the Cisco Press® Networking Technology Series. Security titles from Cisco Press help networking professionals secure critical data and resources, prevent and mitigate network attacks, and build end-to-end self-defending networks.

From reader reviews:

Heather Bencomo:

What do you regarding book? It is not important along with you? Or just adding material when you really need something to explain what you problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have time? What did you do? Every individual has many questions above. They need to answer that question since just their can do that will. It said that about book. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this Security Threat Mitigation and Response: Understanding Cisco Security MARS to read.

Cynthia Johnson:

Reading a e-book can be one of a lot of action that everyone in the world likes. Do you like reading book so. There are a lot of reasons why people love it. First reading a publication will give you a lot of new facts. When you read a publication you will get new information because book is one of many ways to share the information or perhaps their idea. Second, looking at a book will make a person more imaginative. When you reading through a book especially tale fantasy book the author will bring one to imagine the story how the people do it anything. Third, it is possible to share your knowledge to other people. When you read this Security Threat Mitigation and Response: Understanding Cisco Security MARS, it is possible to tells your family, friends as well as soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a e-book.

Roberto Garcia:

Your reading sixth sense will not betray you, why because this Security Threat Mitigation and Response: Understanding Cisco Security MARS book written by well-known writer who knows well how to make book that can be understand by anyone who have read the book. Written with good manner for you, still dripping wet every ideas and writing skill only for eliminate your own personal hunger then you still uncertainty Security Threat Mitigation and Response: Understanding Cisco Security MARS as good book not just by the cover but also from the content. This is one e-book that can break don't judge book by its cover, so do you still needing an additional sixth sense to pick this specific!/? Oh come on your reading through sixth sense already said so why you have to listening to a different sixth sense.

Melinda Brown:

A lot of guide has printed but it differs. You can get it by web on social media. You can choose the very best book for you, science, comedian, novel, or whatever by means of searching from it. It is named of book Security Threat Mitigation and Response: Understanding Cisco Security MARS. Contain your knowledge by it. Without making the printed book, it could possibly add your knowledge and make you happier to read. It is most crucial that, you must aware about guide. It can bring you from one place to other place.
